To Whom It May Concern:

As a competent software developer with experience and interest in creating software and applications using various programming languages and frameworks, being responsible for discussing requirements with clients, creating source code, and coordinating application plan programming expertise, I am positioned to significantly contribute to your goals in this role. As a top-performing, innovative, and solutions-oriented technical professional with experience in implementing and completing software engineering projects, I possess a range of knowledge and expertise that will allow me to contribute to the success of your company.

Through analytical processes, bottom-line-driven processes and IT solutions, I elevated the performance and profitability of organizations resulting in exceeded corporate goals and business requirements. Due to my work on multiple projects from creating an accounting software to working with top companies including JDA Software, Chick-fil-A, and Stanley Black and Decker to develop, maintain and enhance industry-leading and customer-facing software and applications, I am confident in my abilities to generate superior results in this role. I have an excellent reputation for software development, providing solutions to IT problems, troubleshooting, resolving incidents and errors, and driving overall operational improvements. Having worked in multiple industries including automotive mechanic, phone repair and website/application development and on multiple integration and algorithm development projects, I show a promising understanding of software and products as a whole. Accounting for experience founding a software company, I leverage a client-centric approach to assess clients' needs and demonstrate how the clients' features, functions, and benefits meet their needs. I have optimized performance in my past and current jobs with my knowledge of project management. I have also fostered many professional links, as well as mentored and trained many students and community members of Georgia. This in return has helped broaden my connections, as well as my communication and verbal skills.

My attached resume highlights my experience in analyzing complex business requirements, compiling market and trend data, designing enterprise-level solutions to accelerate efficiency and revenue growth. I have acquired experience and knowledge that will allow me to excel as a member of your team. I am working on two different masters' degrees in analytics from Georgia Institute of Technology and business administration from Kennesaw State University (KSU). I also possess a bachelor's degree in Software Engineering from KSU where I graduated with High Honors. With my experience as a founder and Business Owner, I have earned a reputation as a self-directed professional with excellent communication, analytical, and management skills. As a resourceful problem solver, I have a proven ability to conceptualize solutions to challenging situations and maximize success. I have extensive knowledge of multiple applications and languages, along with top-notch technical abilities. My excellent verbal and written communication skills allow me to effectively write reports and present information clearly and concisely. Furthermore, my advanced mathematical knowledge and prior experience with investment and finance has helped highlight the significance of financial modeling, data and reports in decision making.

Furthermore, I am a consummate professional with a creative and strategic vision to develop technical/business strategies that position a company for long-term revenue and profit growth. My proven dedication to optimizing operational success, along with my keen business acumen and visionary strategic planning capabilities will contribute immensely in propelling the organization to the next level of accomplishment. I would love to discuss this further with you. Thank you for your time and consideration, and I look forward to speaking with you!

Sincerely,

Shahzib Sarfraz
